TEKNA AKL SERIES – Solenoid Dosing Pump

Technical characteristics

• Flow rates: from 0.4 to 110 l/h

Max back pressure: up to 20 bar

• Power supply:

• 100÷240 Vac - 50/60 Hz

• Stroke rate: from 120 to 300 strokes/minute

Pump head:

PVDF

Diaphragm: PTFE

 External Enclosure: PP reinforced with fiber glass protection degree IP65

Manually priming valve

Installation kit: Included

Seko Tekna AKL Series is an analogic dosing pump with constant flow rate, which is manually adjustable by a knob mounted on the front panel, in addition there is the level control input than the Tekna AKS.

The flow rate has two frequency ranges:

- 0÷20 % of max flow rate
- 0÷100% of max flow rate

With only 5 sizes that pump can cover a wide range of performances, having a flow rate range from 0.4 to 110 l/h and a back pressure from 0.1 to 20 bar. The power supply is 100÷240 Vac – 50/60 Hz therefore the same pump can operate with different supply voltage, moreover the model AKL603 have the possibility for 24÷48 Vac power supply.

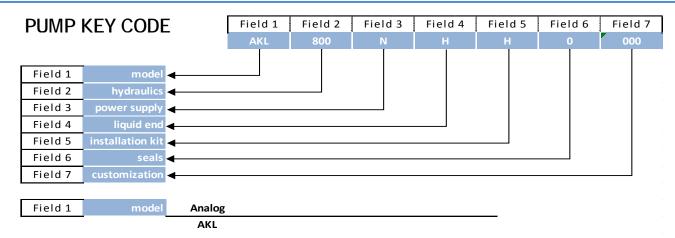

The standard pump head is in PVDF, therefore high chemical compatibility with several liquids end but is available in PVC as well, on request.

All Tekna series are equipped with a manually priming pump for the start up.

The pump is furnished with a complete standard installation kit, which includes: PVDF foot filter and injection valve, PVC suction tube, PE delivery tube. Moreover is available an installation kit in PVDF-T, on request.
